OVERVIEW

Enhancing Business Processes with Higher Flexibility and Efficiency

SAP Consulting & Integration

MAXIMISE BUSINESS VALUE

OPTIMIZE, ADAPT, AND EXTEND YOUR CORE BUSINESS PROCESSES

S & I delivers a full range of solutions to customers who are implementing, upgrading, enhancing, outsourcing or adding value to SAP solutions.

S & I possesses the complete range of SAP functional and technical skills and capabilities to support the SAP ERP system. From consultancy to realisation, from implementation to 'go live', and from applications support to long-term improvement, we have all the required capabilities and 'know how' to apply the right mix to fulfill every customer's requirements.

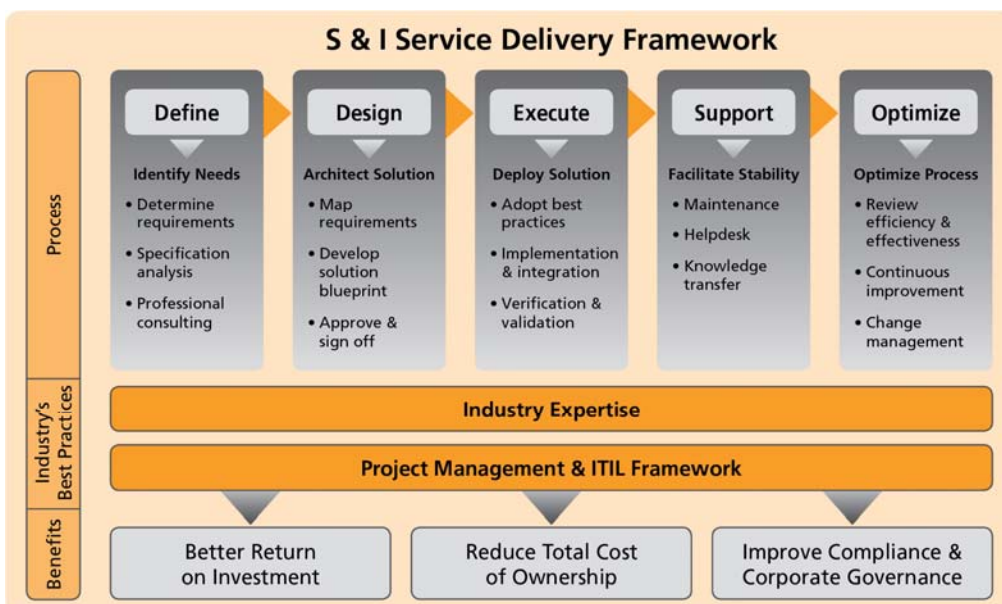

SAP SERVICES

Our SAP business specialises in application support, hosting, outsourcing, managed services, change management and training. Along with the implementation of a broad range of solutions, which include SAP ERP, SAP Business Objects and Enterprise Portal, S & I has the industry domain to address the business needs encompassing manufacturing and distribution operations.

As a leading integrator and innovator, we offer solutions to private and public sectors. We have a successful track record in integrating various best-of-breed systems, solutions and technologies with SAP. With SAP's true end-to-end seamlessly integrated ERP solution, S & I has the experience in delivering the solution in a consultative value-adding manner with a focus on customer's KPIs and addressing their business pain-points.

S & I PROJECT DELIVERY METHODOLOGY

Our extensive experience in project management with proven project delivery methodology, known as S & I Service Delivery Framework, enables S & I to minimise risks and maximise the business benefits to our customers. The SAP ERP solutions is able to offer competitive advantage to clients, with its best practices and industry standards by replicating and improving proven solutions implemented around the world.

INCORPORATING TECHNOLOGY AS A BUSINESS DRIVER

Due to further developments and maturity of technology with (common) use of open standards instead of custom made, IT architecture and integration issues between SAP (and non-SAP) systems have become more relevant nowadays for SAP customers. S & I's initiative to incorporate SAP's NetWeaver technology as a business driver adds value to business operations by interfacing with legacy and third party systems to extract data easily for collaborative use.

S & I AS YOUR TRUSTED SAP PARTNER

As an end-to-end IT services provider, S & I delivers real benefits and return on investment to our customers through implementing SAP solutions. Our technical expertise and industry knowledge have enabled us to become market leaders in these areas, adding business value while delivering the best-fit solution.

S & I adopts a comprehensive set of methodologies and processes to provide quality solutions to our customers.
